Created by Raymond Vanbreuseghem (1909-1993)

The RV collection/ Vanbreuseghem Mycotheque

Initiated in 1947 as he was working at the Parasitology Institute of the Faculty of Medicine of Paris (Maurice Langeron laboratory)

Integrated in 1997 in the BCCM/IHEM collection. More than 4000 RV strains are available in the IHEM public catalogue. The oldest is a *Microsporium audouini* isolated by Emile Rivalier in 1947

More than 12000 strains from all over the world including:

- About 3400 dermatophytes, half of them from Africa
- The world largest collection of *Cryptococcus neoformans* (more than 2500 strains)

From 1961, the RV collection continued to develop at the Institute of Tropical Medicine in Antwerp

Initiated around 1965 by Janssen Pharmaceutica

Officially recognized by their «B» acronym, strains were collected until 1991

The Janssen collection

JANSSEN RESEARCH FOUNDATION

Integrated in 2000 in the BCCM/IHEM collection. More than 500 Janssen strains are available in the IHEM public catalogue. The oldest is a *Candida albicans* isolated in 1968.
